Join APICS New Haven Chapter and ASQ new Haven for an exciting topic of **3D Printing Demonstration at UNH West haven, presented by Dr. Maria-Isabel Carnasciali. Very Limited Seating based on First Come First Served.**

## *About Our Meeting*

**3D Printing:** "This month we come to the University of New Haven for a hands-on, 3D Printing workshop at their Makerspace. 3D Printing and additive manufacturing technologies are revolutionizing many industries - from art, to manufacturing practices, to medical advancements. The technology has begun to infiltrate everyday life as the technology comes down in price; we see libraries, community spaces, and individuals acquiring the equipment. Come learn what the technology is all about and get experience designing, processing, and 3D printing a simple part."

## *About Our Speaker*

Maria-Isabel Carnasciali joined the University of New Haven's Engineering faculty in 2010. She received her PhD. from Georgia Tech in 2008 specializing in the area of thermal-fluid sciences, Her B.S. in Engineering is from MIT's Mechanical Engineering Program. Her interest and involvement with 3D printing go back to her thesis work to quantify the frictional forces associated with non-coalescing drops, which involved manufacturing of tiny cantilever beams with the use of Stereo lithography - a 3D printing method. At the University, Dr. Carnasciali now serves as Director to the Prototyping & Ideation Laboratories, including the new University Makerspace.
